(54) Title: ARRAYED POLYNUCLEOTIDES

(57) Abstract: The present invention is concerned with methods of producing fabricated arrays comprising clusters of clonal copies of one or more target molecules. In particular the invention relates to methods comprising providing clonal copies of a single target molecule within a vesicle or on the surface of a solid support within a chamber defined by a vesicle in contact with a solid support to produce clonal copies thereof and immobilising the copies on the solid support.
